**” MY DAUGHTER HAS THE PRADER-WILLI
SYNDROME”**

WHAT NOW?

We want to tell you our experience as a family having a child affected with the Prader-Willi Syndrome. This is our testimony.

We started writing this book in 1989, when we lived one of the saddest moments in the long process involving this pathology.

Nowadays, after more than ten years, we want to share it with every one, including health specialists and families with children affected with this Syndrome.

When Pía Macarena de Jesús was born in 1988, there was almost no experience in Chile about this pathology and only the power of love and perseverance of our family helped us to understand the big mystery.

I believe that only people who have suffered a specific trouble like this can effectively help others. This is our mission and we hope this book can be a complement to understand the syndrome and help you to improve the quality of life of your children.

This is the history of Pía, written by parents...like You.
